

Music Therapy Clinical Internship Opportunity

Johns Hopkins All Children's Hospital
St. Petersburg, Florida

Description: Johns Hopkins All Children's hospital is a 259 bed center for treatment, teaching, research, and advocacy, located in west-central Florida. Our children range from premature infants to young adults. Many patients at Johns Hopkins All Children's are acutely or chronically ill and are treated under a wide range of medical services. Children are also treated through the Emergency Center, Outpatient Surgery and several outpatient clinics and doctors' offices. Johns Hopkins All Children's is a teaching hospital and works closely with multiple universities and teaching institutions.

Geographical Location: Johns Hopkins All Children's Hospital is located near downtown St. Petersburg at the southern end of Pinellas County. The Gulf of Mexico and Tampa Bay are short drives from the hospital campus. Interstate 275 provides a direct route to Tampa and Sarasota. Orlando is approximately 2 hours east of the Tampa Bay area. The Tampa International Airport is 15 minutes from the hospital.

Music Therapy Services: Music therapy is available to any child referred by physicians, families, or staff. Children and young adults are served through individual and group sessions. Patients are seen in their rooms, playrooms, treatment rooms, surgery holding, intensive care units, and on campus clinics. Music Therapy is a program of the Child Life Department, and the therapist works closely with members of this and other departments.

Internship Focus: Interns will learn the function of music therapy within a pediatric hospital setting. Training will include developmental effects of hospitalization on children of all ages, basic descriptions of common illnesses and their treatments, and the use of music therapy as a coping intervention. Interns will work with staff members in other professions as a member of the health care team. Upon completion, interns will meet AMTA competencies.

Expectations of Interns: With support of the Internship Director, interns at Johns Hopkins All Children's Hospital will be expected to identify personal strengths and challenges, set internship goals, and evaluate progress on a regular basis. Interns will demonstrate the ability to process and utilize information, feedback, and constructive criticism. Interns are also expected to seek guidance when faced with difficulties.

Philosophy of Music Therapy at Johns Hopkins All Children's Hospital: Music Therapy at Johns Hopkins All Children's Hospital is an integral part of the care of hospitalized children and their families. Music affects mental, physical, and emotional responses, and it is utilized as a valuable tool in supporting the treatment and recovery experience. Through music therapy interventions, we provide patients and families with ways to decrease anxiety, get through procedures, feel safe and secure, and build positive coping skills. Music helps children cope with pain, discomfort, and stress, and motivates them to continue their developmental paths. We provide family centered care, which means that we incorporate and support the whole family, not just the hospitalized child. We incorporate an eclectic approach to best meet each individual's needs.

Expectations: Prospective interns must have completed coursework in an approved music therapy degree program and must demonstrate competency in the following areas:

(Continued on following page)

Updated Jan. 2019

Updated Jan. 2019

With this application, please include **all** of the following:

- **Resume** – including population & ages served in clinical practicums. Include current practicum.
- **Official Transcript**
- **Letter of eligibility** from your Music Therapy Academic Director
- **Your personal mission statement**
- **Three (3) letters of reference** (see below for parameters)
- **Audition recording**

Personal Mission Statement

Your personal mission statement may include what you are passionate about, your values, your strengths and weaknesses, your priorities, or your objectives as they relate to music therapy, your goals for the future, and this internship.

Letters of Reference

Please submit three letters of reference, two (2) of which must be from clinical music therapy supervisors, and one (1) should be from a professor familiar with your musical/academic skills. Letters of reference should be submitted directly from the reference writer to the music therapy internship director, Erin Seibert. Mailing and email address for submission is below. If letter of reference is included with the application packet, it must have an official seal or signature.

Audition Recording

Please include a YouTube link demonstrating your keyboard, guitar, and vocal skills on four (4) songs total. Please identify the key, artist, and title of each song played in your audition.

- Choose two (2) songs from the genres listed below to play on guitar.
- Choose two (2) songs from the genres listed below to play on piano.
- Provide only one song from each genre: pop, current country, rock, R&B, hip hop, folk, gospel, world music, Contemporary Christian, reggae, Disney, and/or children's music.
- If your primary instrument is not voice, guitar, or piano, please also include one recording of your choice on your primary instrument. Recordings must NOT include actual clients.

Please tell about yourself. Use a separate sheet of paper to answer the following:

1. Describe your musical experiences and training.
2. Describe your academic training including schools attended.
3. Describe any volunteer work you have done.
4. Describe extra-curricular organizations of which you have been a part and any leadership roles you have held.

Please answer the following questions.

1. What is your personal definition of Music Therapy?
2. What qualities can you bring to Johns Hopkins All Children's Hospital?
3. Why did you choose Music Therapy as a career?
4. What are your expectations for an internship?
5. What is or has been the most difficult part of your Music Therapy training?
6. What strategies did you use or are you using to overcome this difficulty?
7. Describe the most valuable experience or lesson you have had in your training thus far. Why was this experience valuable?
