New Building Opens Door to Discovery

The Johns Hopkins All Children’s Research and Education Building opened during a ribbon cutting ceremony on the main campus Sept. 20 in St. Petersburg. The $95 million, 225,000-square-foot building houses the hospital’s institutes, its graduate medical education and simulation programs, an expanded biorepository and a new team of fundamental scientists who will seek to understand the origins of diseases and how to prevent them. The basic scientists are members of or have affiliations with the hospital’s new Institute for Fundamental Biomedical Research.

The hospital’s research program anchors multicenter clinical and translational studies such as KIDS-DOTT, which focuses on thrombosis, and Prospective Research on Early Determinants of Illness and Children’s health Trajectories (PREDICT). With the new building, Johns Hopkins All Children’s expects to become involved in more clinical studies and at earlier phases.

Grand Rounds and other Continuing Medical Education opportunities soon will be hosted in the building’s 250-person auditorium. The Peabody restaurant, operated by the owners of Tampa’s Oxford Exchange and open seven days a week to the public, is on the ground floor of the building and is intended to promote informal exchanges of ideas.
Directory of Physicians & Services Now Available Online

The 2018 Directory of Physicians & Services is available online at HopkinsAllChildrens.org/outpatientcare to view or download. It was mailed to community physician offices and outreach locations in June. It includes highlights and contact information for each clinical institute, the departments of anesthesia, medicine and surgery, research, education, LifeLine, Johns Hopkins All Children’s Home Care and our integrated regional network.

Multidisciplinary Clinic Spotlight

The Stroke Clinic provides family-centered, comprehensive and coordinated care to infants, children and teens who have suffered a stroke. Our multidisciplinary team brings together a team of professionals devoted to stroke in children, neurologists, hematologists, physical/rehabilitative medicine and neuropsychologists, radiologists and a care coordinator. The team’s coordinated approach is aimed at preventing future strokes and helping a child to achieve maximum recovery.

Conditions we treat:

- Perinatal stroke
- Arterial ischemic stroke
- Hemorrhagic stroke
- Cerebral sinovenous thrombosis
- Moyamoya disease

For information or to refer a patient, visit HopkinsAllChildrens.org/stroke or call 727-767-8407.
