Multidisciplinary Clinic Spotlight

The Head Shape Clinic is a multidisciplinary clinic offered at four different Johns Hopkins All Children's locations. Patients are seen by specialists during their clinic visit, including a surgeon who discusses treatment options and screens for craniosynostosis and other conditions that may impact the shape of the head. A physical therapist screens for torticollis and other neuromuscular disorders that can cause deformation of the skull and, when appropriate, they arrange to treat these conditions. Finally, an orthotist evaluates the patient when the surgeon and family agree that the child is a good candidate for treatment of deformational plagiocephaly with a helmet.

Head Shape clinic is offered conveniently closer to home at four outpatient care centers:

St. Petersburg, Main Campus
Clinic is offered on the first and third Mondays

Fort Myers
Clinic is offered on the second Monday

East Lake
Clinic is offered on the third Tuesday

Tampa
Clinic is offered on the second Friday

For more information or to refer a patient call 727-767-8181 or visit online at https://tinyurl.com/head-shape-clinic
Pediatric Surgery Updates

The Johns Hopkins All Children's Department of Surgery will hold a half-day afternoon clinic every Tuesday at the South Tampa Outpatient Care Center starting April 3, 2018. The pediatric surgical providers will be offering new, follow-up and post-operative appoints for patients with:

- Hernias
- Undescended testicles
- Gallstones
- Tongue-tie
- Circumcisions
- Lymph nodes
- Pilonidal cysts
- Dermoid cysts and masses
- Central line placement and removals
- Intestinal disorders
- Anorectal malformations
- Soft tissue masses
- Chest wall deformities

For more information on services provided or to refer a patient, call 727-767-4170 or visit www.hopkinsallchildrens.org/surgery

Doctors' Day Celebrations

Doctors' Day is March 30, a day to dedicated to honor physicians for their excellent care of and contributions to the health of patients and communities. Please join us for a Doctors Day Social to be held on May 9 at 6:30 p.m. at the Duncan McLellan Gallery in the arts warehouse district of St. Petersburg. All physicians from throughout the region are invited. A printed and electronic invitation will be forthcoming with details and RSVP mechanism. To learn more or RSVP early, please contact Jennifer Garcia at jgarcj70@jh.edu.
Meet the Johns Hopkins All Children’s Psychology Providers

The Mind Body Branch of the Institute for Brain Protection Sciences provides mental health screenings, consultations, evaluations and treatment. Our providers are uniquely suited to provide consultations for medical/surgical inpatients and ambulatory psychiatric, psychological and neuropsychological clinical services.

**Jennifer Katzenstein, Ph.D., ABPP-CN** is the Director of Psychology & Neuropsychology and Assistant Professor of Psychiatry and Behavioral Sciences at Johns Hopkins School of Medicine. Board certified in pediatric neuropsychology, Dr. Katzenstein oversees a team of 10 psychologists and neuropsychologists, as well as 4 trainees and 2 psychometrists. Dr. Katzenstein provides neuropsychological evaluations for children with complex medical conditions to evaluate the needs for treatment planning and education. She offers outpatient evaluations at our main campus and at IMG Academy in Bradenton.

**Lacy Chavis, Psy.D.** is a clinical psychologist specializing in early childhood development and perinatal mood and anxiety disorders. Dr. Chavis cares for infants and families in the NICU and the Neonatal Follow-Up Program providing intervention and assessment. She offers inpatient consults in the NICU on the main campus.

**Melissa Faith, Ph.D., ABPP** is a pediatric psychologist specializing in evidence-based interventions to improve patient and family adjustment and adherence to pediatric cancer and blood disorder regimens. Dr. Faith offers inpatient consults with our hematology/oncology patients and provides outpatient therapy for hematology/oncology on our main campus.

**Marissa Feldman, Ph.D.** is a pediatric psychologist specializing in the evaluation and treatment of children and adolescents with acute and/or chronic medical conditions to promote psychological health and well-being with a focus on adaptation and coping with illness, treatment adherence and emotional and behavioral functioning. Dr. Feldman offers inpatients consults and manages the consultation-liaison service, a new service to Johns Hopkins All Children's Hospital on our main campus. She is also the lead psychologist on our post-doctoral psychology fellowship program.

Lauren Gardner, Ph.D. is the interim Administrative Director of the Autism Center and the Psychology Internship Director. Dr. Gardner is a pediatric psychologist specializing in the assessment and diagnosis of autism spectrum disorder, intellectual disability and other developmental disorders in young children. She offers outpatient consults for evaluation of developmental disabilities and coordinates the interdisciplinary autism center evaluations at our main campus.

Jason Hangauer, Ph.D., NCSP is a pediatric psychologist specializing in the evaluation and treatment of autism spectrum disorder and developmental disabilities. He offers outpatients evaluations of developmental disorders and autism spectrum disorders at our main campus.

Kristin Hoffman, Ph.D. is the Director of Trauma Psychology program and a clinical child and adolescent psychologist. Dr. Hoffman specializes in program development, assessment and treatment of childhood traumatic stress and child disruptive behavior disorders, dissemination of evidence-based practices for child trauma, and development of trauma-informed child welfare systems.

Aja Meyer, Ph.D. is a pediatric psychologist specializing in cognitive-behavioral therapy, including Acceptance and Commitment Therapy and mindfulness-based cognitive therapy. She offers outpatient evaluations and therapy at our main campus.

Vanessa Ramos Scarborough, Ph.D. is a pediatric neuropsychologist and licensed psychologist specializing in outpatient neuropsychological assessments for children, adolescents and young adults with a broad array of congenital, acquired and neurodevelopmental disorders. She sees patients diagnosed with epilepsy/seizure disorders as well as traumatic brain injuries and is fluent in Spanish and Portuguese. She offers outpatient neuropsychological evaluations for English and Spanish speaking patients at our main campus.

Jillian Wise, PhD, NCSP is a neuropsychology post-doctoral fellow providing inpatient and outpatient neuropsychological evaluations for children, adolescents and young adults with complex and chronic medical conditions. Dr. Wise participates in interdisciplinary team clinic and provides recommendations for cognitive and behavioral functioning as well as school-based recommendations. She provides neuropsychological evaluation and consultation on our main campus.

Valerie Valle, Ph.D. is a licensed psychologist who specializes in sport and performance psychology. In addition to working with students at IMG Academy she also provides psychological assessments and individual and group therapy, as well as outreach on sport and performance psychology. She offers outpatients therapy at our main campus and at IMG Academy.

6th Scientific Meeting of the World Society for Pediatric Congenital Heart Surgery Call for Abstracts and Scientific Track Options

Abstract submissions and/or previously published data depicting original research, evidence-based practice, and/or quality improvement relevant to the study of pediatric cardiovascular care are now being accepted for the 6th Scientific Meeting of the World Society for Pediatric Congenital Heart Surgery. Authors will select the category that best fits their content from the list below. Don’t miss this unique opportunity to present your research on this world stage. The conference will take place July 22-26, 2018 at Walt Disney World near Orlando, Florida. Deadline for Abstract Submission: 11:59 p.m. May 25, 2018.

Abstracts can be submitted online at https://tinyurl.com/WSPCHSabstracts

Scientific Track Options for the 6th Scientific Meeting of the World Society for Pediatric Congenital Heart Surgery:

- Surgery
- Cardiology
- Anesthesia
- Intensive care
- Nursing
- Perfusion
- Administration

Learn more about these tracks and view the agenda online at https://tinyurl.com/WSPCHSagenda.
